Veneered tops can be specified with decorative inlays & borders. Toughened glass tops can be clear, sandblasted or back painted in any colour. Both veneer and glass can feature graphics & logos.

Veneers

The veneers shown above are popular standards taken from hundreds available. They can be used on their own or combined with decorative inlays to create stunning designs.

A sample of popular special veneers. They are often selected to enhance laser cut feature panels, logo's and picture frame borders.
